SACRUM

REJUVYN

PROFESSIONAL COLLABORATION

Statement of Partnership and Letter of Intent

Between SACRUM and Rejuvyn

SACRUM and Rejuvyn hereby affirm their professional partnership in responsible, ethical and participant-centred support for psilocybin-assisted processes, delivered in accordance with the laws applicable to each process and location.

SACRUM is an official partner of Rejuvyn, a Netherlands-based centre offering carefully prepared and professionally facilitated individual and group psilocybin programmes, encompassing preparation, the lived experience and integration.

Our partnership is grounded in rigorous preparation, thoughtful screening, informed consent, harm reduction and sustained integration into everyday life.

Scope of collaboration

- supporting people considering, preparing for or participating in Rejuvyn's individual and group programmes;
- psychoeducation, intention-setting, readiness assessment and clear communication of limitations and risks;
- continuity of support before, during - within the parties' respective competences and agreed roles - and after the experience;
- individual, group, educational and community-based integration support;
- high standards in harm reduction, informed consent, confidentiality, relational ethics and participant wellbeing;
- exchange of good practice across psychotherapy, embodied work, psychedelic integration and education;
- a responsible public conversation rooted in humility, evidence-informed practice and respect for diverse perspectives.

Shared commitment

The parties recognise that psilocybin-assisted processes are not a universal solution. They require individual assessment, appropriately qualified practitioners and clear respect for professional boundaries. Each party remains independent and responsible for its own actions, standards and legal compliance.

This partnership advances the quality, safety and accessibility of responsible support for people from Poland and across Europe. It may be communicated publicly by both parties as confirmation of the partnership, subject to the agreed scope of cooperation and each party's brand guidelines.
